

NEW ORGANISATION & NEW MANDATES

New organisation

During the 3rd quarter 2010, NGI undertook an internal re-organisation in order to improve its services, optimise its competences and increase its availability.

Since 1st September 2010, Jordi Guillo has been appointed Director and is in charge of the portfolio and wealth management which has been his main activity since 2004. He is assisted by Gabriela Turcatti who is more particularly in charge of the clientele's daily follow-up.

Marie-Aude von Scarpatetti, our President Jean Naef's grand-daughter, has been appointed Vice-president and continues assuming all the Company's administration. She also closely collaborates with Jacques-Antoine Redier, our Real Estate specialist.

Real estate activity and products

NGI is going to develop together with Implemia Développement, an IEPA ("Immeuble à Encadrement pour Personnes Agées") building on behalf of the FRKB, one of the State of Geneva's public law foundations. Located in the municipality of Meyrin, this HBM ("Habitation à Bon Marché") building should represent 70 apartments. The construction should start by the end of 2011.

The brokerage activity has considerably increased recently, as several sale mandates have been signed together with some research mandates as well. These new mandates mainly concern Switzerland, France and the USA. A list of **available assets** has been attached to this newsletter; it may be of interest to potential clients seeking residential and/or investment opportunities.

In addition, NGI offers a personalised support for any specific query that may arise.

Portfolio & wealth consolidation

Further to NGI's re-focusing on its core business as a (multi-)Family Office, we gladly see our efforts rewarded by some new portfolio and family wealth consolidation mandates.

This aspect of our activity truly represents the heart of our Family Office trade and allows families to obtain an independent, neutral and consolidated view of their patrimonial assets. This management tool is essential to identify any possible incoherence
